

Introduction

Help your students “learn how to learn!”

Lay a strong foundation in listening skills, the ability to follow directions, and in the ability to remember what one sees and hears—important skills that students need to be successful both in school and in everyday life. Research has shown that visual and auditory discrimination and memory skills should be taught and that practice is required to improve these skills. The engaging activities found in *Listen, Look, and Do!* will provide young and special learners with meaningful skill practice.

A wide variety of activities are included:

- Stories and Rhymes
- Puzzles
- Pictures to Color
- Cut-and-Paste Activities
- Games
- Sequencing Activities
- Same and Different Concepts
- Hidden Pictures
- What’s Wrong Pictures
- Listening Games
- Following Directions
- Large Group Activities

Contents

Chapter 1—Introduction to Auditory Discrimination and Listening Skills
